

University of Pennsylvania, Biotechnology Master's Program
Laboratory Requirement Waiver

Students of the Biotechnology Master's Program are required to complete one credit unit (1 cu) of an approved graduate level laboratory course. In certain situations, students may waive this requirement due to prior experience. Generally, the lab requirement has been waived due to laboratory work experience, an independent study that takes place in a lab, or previously completed graduate level laboratory courses. This decision is made by the Biotechnology Office on a case by case basis and must be accompanied by supporting documentation. Please note this form is the ONLY way to request a waiver.

INSTRUCTIONS - READ THOROUGHLY

Step 1: Please fill out this form on the computer. When completing the section describing why you feel the lab requirement should be waived, please be as thorough as necessary and attach supporting documentation that shows your knowledge and background (course description/syllabus, transcript, resume, etc.).

Step 2: Students who are approved for the lab waiver still must complete 11 course units. Therefore, students must provide an alternative course (to be placed on the "Replacement Course" lines below) that they will be taking in place of the lab requirement.

Step 3: Submit the completed form to the Biotechnology Office by email at biotech@seas.upenn.edu with all supporting documentation. Once reviewed, you will be notified via email of the decision. If approved, you are responsible for registering yourself for the replacement course you have listed below through Penn-in-Touch.

APPROVAL OF THIS WAIVER PERMITS YOU TO TAKE ONLY THE REPLACEMENT COURSE YOU INDICATED BELOW INSTEAD OF A LAB COURSE.

Name: _____ Today's Date: _____

Penn Email: _____ Program Track: _____

Replacement Course Title: _____

Replacement Course ID (ex: BIOL-402-001): _____ Semester/Year: _____

Describe why you feel that your lab requirement should be waived:

WARNING: Your form will not be reviewed without all required supporting documents (see 'Step 1' above)
